Adding TMVR to Your Practice

The Essentials from Skills to Team Set-up

Paul Sorajja, MD
Roger L. and Lynn C. Headrick Family Chair
Valve Science Center
Minneapolis Heart Institute Foundation
Abbott Northwestern Hospital
Disclosures

- Abbott Structural: consulting, speaking, grants
- Medtronic: consulting, speaking, grants
- Edwards: consulting, grants
- Boston Scientific: consulting, speaking, grants
- Integer: consulting
Why don’t we just do for TMVR what we did for TAVR?
Mitral Complexity

- Multiple etiologies
- Multiple therapies
- Multiple outcomes
Most TMVR candidates

Primary MR
- Many guidelines

Secondary MR
- Few guidelines
The Heart Team of Cardiovascular Care

David R. Holmes, Jr, MD,* Jeffrey B. Rich, MD,† William A. Zoghbi, MD,‡ Michael J. Mack, MD,§ Rochester, Minnesota; Norfolk, Virginia; and Houston and Dallas, Texas

Optimization of novel, complex options

Class I for Intervention

For most MR patients, heart failure specialists needed
CT Images courtesy of John R. Lesser, MD
Echo images courtesy of Richard Bae, MD
Valve Conference

Weekly uninterrupted meetings
Quorum required for practice alignment

No rubber stamping
Mullins sheath

Dilator

BRK, Standard Curve
Next Gen Intrepid TMVR

Trans-septal

• Enabled by implant design not requiring rotational alignment or need to capture leaflets
• One implant platform for both TS and TA
Key Points

• Align your team, especially the heart failure specialists

• Surgeons, cardiologists, imagers essential

• Be comfortable in the left atrium
